ABHIJIT AMBADKAR

ASSOCIATE ENGINEER

+91-8879937413 aambadkar@rediffmail.com Nagpur-MH

EDUCATION

Diploma In Mechanical Engineering

G.H. Raisoni Polytechnic, Nagpur
January 2006

SSC

Sanjuba High School, Nagpur
January 1999

TECHNICAL SKILL

- AutoCAD
- ZWCAD
- SAP S/4HANA
- MS WORD & EXCEL

TECHINCAL STRENGTH

- Understanding of Tower Drawings & BOM
- Knowledge of Steel Sections & Components
- Bolts & Fitment Knowledge
- Field Assembly Skills
- Safety Knowledge Measurement & Quality Verification
- SAP & Documentation Skills
- Communication & Coordination

LANGUAGE

- Marathi
- Hindi
- English

PROFILE

Mechanical Engineer with over 20 years of experience in Engineering Design & Development within the Power Sector, specializing in Transmission Line Towers & Gantry Structures. Currently working as an Associate Engineer at KEC International Ltd., Mumbai. Skilled in AutoCAD, SAP S4HANA, proto assembly, and engineering documentation. Proven ability to lead drawing reviews, manage client inspections, and resolve shop floor queries.

WORK EXPERIENCE

KEC International Ltd., Mumbai — 2015 – Till Date

Associate Engineer - Engineering

- Performed proto tower assembly checking, ensuring dimensional accuracy, bolt alignment, and correct section fitment.
- Conducted BoM vs Actual Material verification to ensure correct section, quantity, grade, and availability.
- Cross-checked shop drawings, proto sketches, weld maps, and inspection reports for completeness and accuracy.
- Utilize SAP S4/HANA (PP Engineering Module) to manage BoM transactions and documentation, ensuring seamless integration across engineering and production workflows.
- Develop and refine operational sketches to support tower operations, improving clarity and execution on the shop floor.
- Prepare BoMs for proto and mass production, including weight estimation and bolt/nut placement as per standard grip charts.
- Execute tender-related tasks, including weight estimation and BoM creation from line diagrams, ensuring accurate bolt and nut quantities.
- Function as a key contributor to process improvement initiatives, optimizing documentation practices and enhancing operational efficiency.
- Collaborate with cross-functional teams to resolve shop floor queries and facilitate smooth client inspections.

Abengoa Power Structure - Baroda — 2013 – 2015

Proto In-Charge - Engineering

- Led proto assembly of transmission towers and gantry structures (33kV to 765kV) using tower cranes, ensuring precise bolt and nut placement as per structural drawings and standard grip charts.
- Conducted dimensional verification of proto assemblies using structure drawings, BoMs, and shop sketches, ensuring readiness for client inspection.
- Reviewed fabrication and welding activities to ensure compliance with detailed engineering drawings and quality standards.

PERSONAL INFO

- DOB : 19/10/1983
- Marital Status : Married

CURRENT JOB LOCATION

- B-190, MIDC, Butibori, Nagpur, Maharashtra, 441108

MAIN OFFICE LOCATION

- RPG Centre, 30-Forjett Street, Near Bhatia Hospital, Tardeo, Mumbai, 400036

- Performed quality checks on prototype materials, including hole diameter, thickness, length, and material grade, as per shop drawings.
- Finalized shop and structural drawings prior to client submission, incorporating necessary corrections and feedback.
- Managed client inspections, addressing technical queries and ensuring successful validation of proto assemblies.

Sanvijay Rolling & Engineering Ltd. - Nagpur 2010 – 2013

Engineer - Transmission Tower Assembly & Testing

- Managed vertical assembly and testing of 132kV and 400kV transmission towers for domestic and international clients at
- major test stations including R&C Test Bed (Nagpur), CPRI (Bangalore), and Gammon Test Bed (Wardha).
- Led proto assembly and inspection of 400kV towers, ensuring dimensional accuracy and compliance with structural drawings, BoMs, and shop sketches.
- Conducted quality checks on prototype materials, verifying parameters such as hole diameter, thickness, length, and material grade against engineering specifications.
- Reviewed and finalized shop drawings, ensuring alignment with structural requirements and client expectations.
- Coordinated with fabrication teams to ensure timely execution and adherence to design standards.
- Supervised the installation and commissioning of lift machinery at client sites, ensuring timely execution and adherence to safety and quality standards.

Johnson Lifts Pvt. Ltd. | Nagpur 2008 – 2010

Junior Engineer – Mechanical Design & Installation

- Designed key lift components including car bodies, ceilings, brackets, and
- winding units, ensuring structural integrity and compliance with design
- specifications.
- Prepared and managed Bill of Materials (BoM) using SAP, supporting accurate
- procurement and production planning.
- Supervised the installation and commissioning of lift machinery at client sites, ensuring timely execution and adherence to safety and quality standards.

Sanvijay Rolling & Engineering Ltd. | Nagpur 2006 – 2008

Junior Engineer – Mechanical Design & Fabrication

- Assisted in various mechanical engineering activities related to rolling mill operations and fabrication processes, supporting production efficiency and equipment reliability.
- Utilized AutoCAD to prepare detailed assembly drawings for rolling mills and furnaces, ensuring design accuracy and alignment with manufacturing requirements.
- Collaborated with senior engineers and fabrication teams to implement design modifications and support smooth execution on the shop floor.
